Outdoor Spaces

Volume I Price List

ATCOM MEGA

1

Light is there to provide comfort, a feeling of ease for the eye and self, during the day or at night. This way we develop lighting solutions that enhance people's lives, and therefore people's quality of life. We bring our experience in light to the service of architects, landscape and lighting designers, realizing what is in their mind, creating a lighting scenography integrated in the environment and complementing the architecture. Using the right light in the right way to make architectural and landscape concepts stand out.

Dimming and Coloring

2700k & 5700k

Tunable White

Tunable White technology achieves the dynamics of white light,i.e. a temperature variation between 2700K and 5700K, while maintaining constant lighting intensity.

RGB

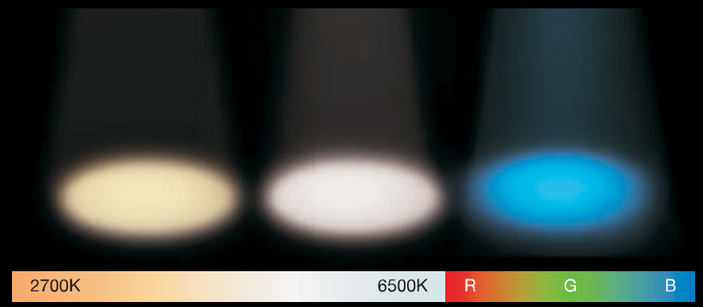

TW RGB

Tunable White/RGB

Innovative TW RGB technology amplifies even further the positive impact of Tunable White, thereby also allowing colour variation to transform the setting and stimulate synaesthetic associations.

2700K 1800K,

Warm Dimming

Warm dimming is the new function that changes colour temperature from 2700K to 1800K at the lighting intensity decreases, up to all 5%, maintaining constant colour yield and reproducing the reactive effect of halogen.

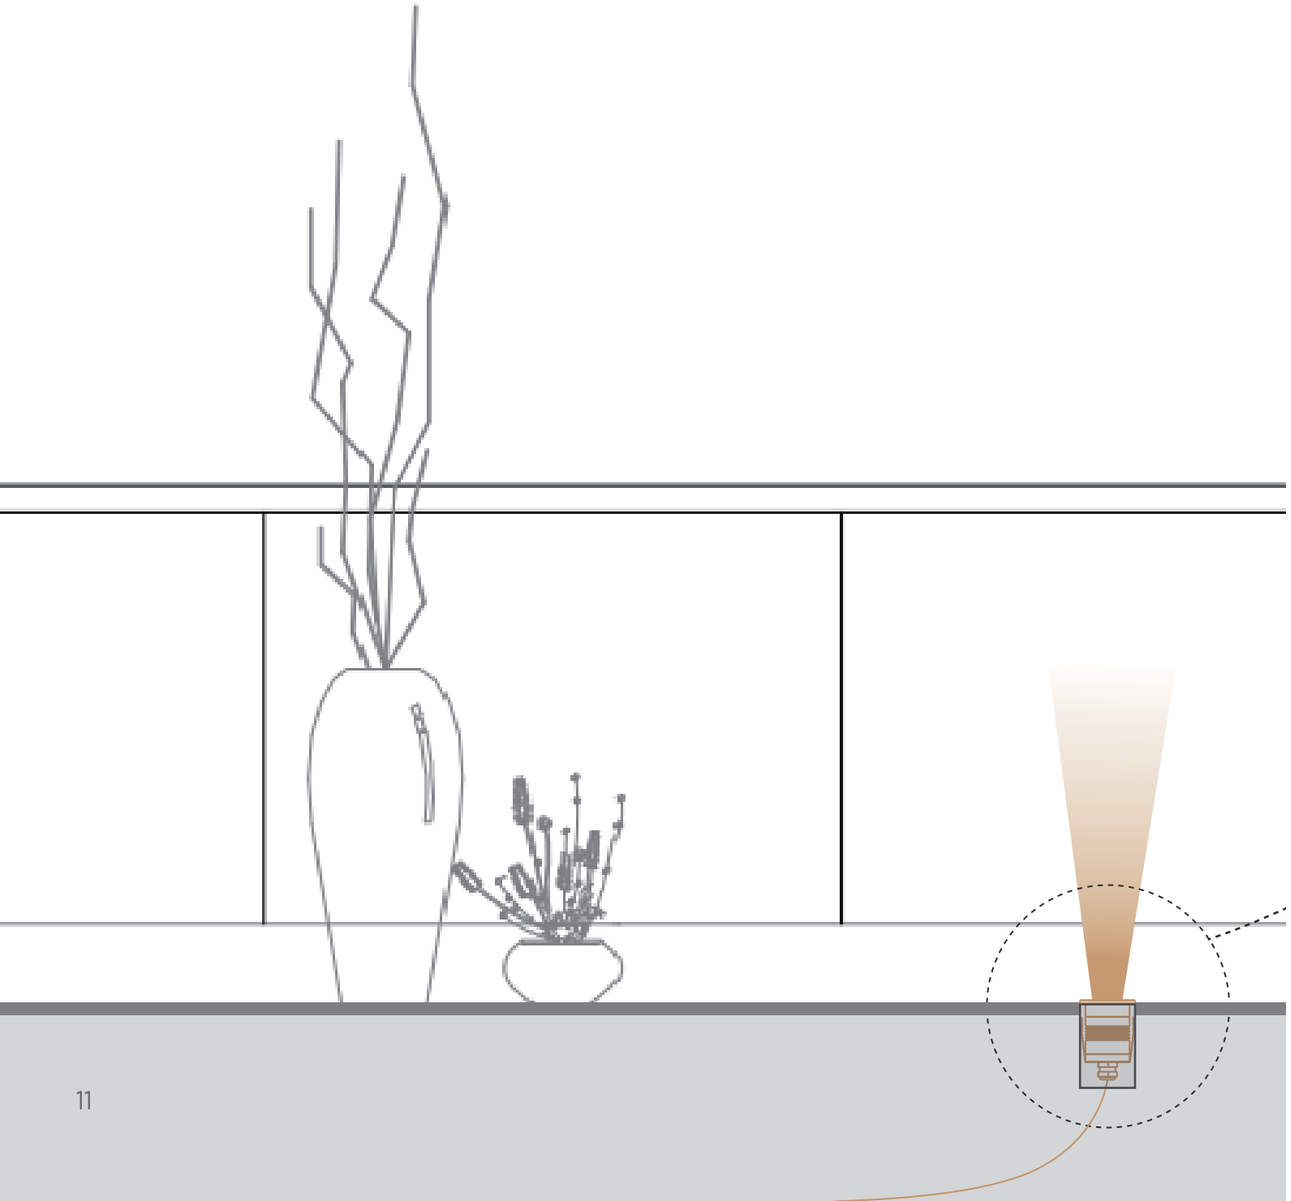

ATCOM MEGA

ATCOM outdoor garden light series offers a range of underground and spike lights, designed to enhance the brilliance of your landscape lighting with an artistic touch. Operating on low voltage power DC24V, these lights prioritize safety and efficiency while illuminating your outdoor space with style and sophistication.

ATCOM MEGA

GARDEN SPIKE

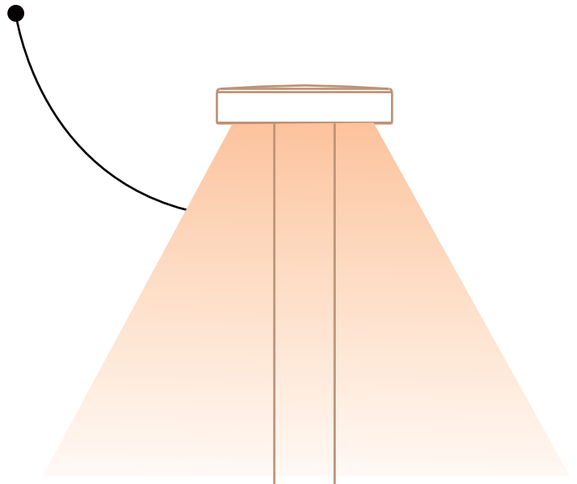

Accentuating the façade, putting the garden into the right light, and ensuring that paths remain visible even in the dark - modern outdoor lights are real all-rounders. Simply select your favorite lights and start planning.

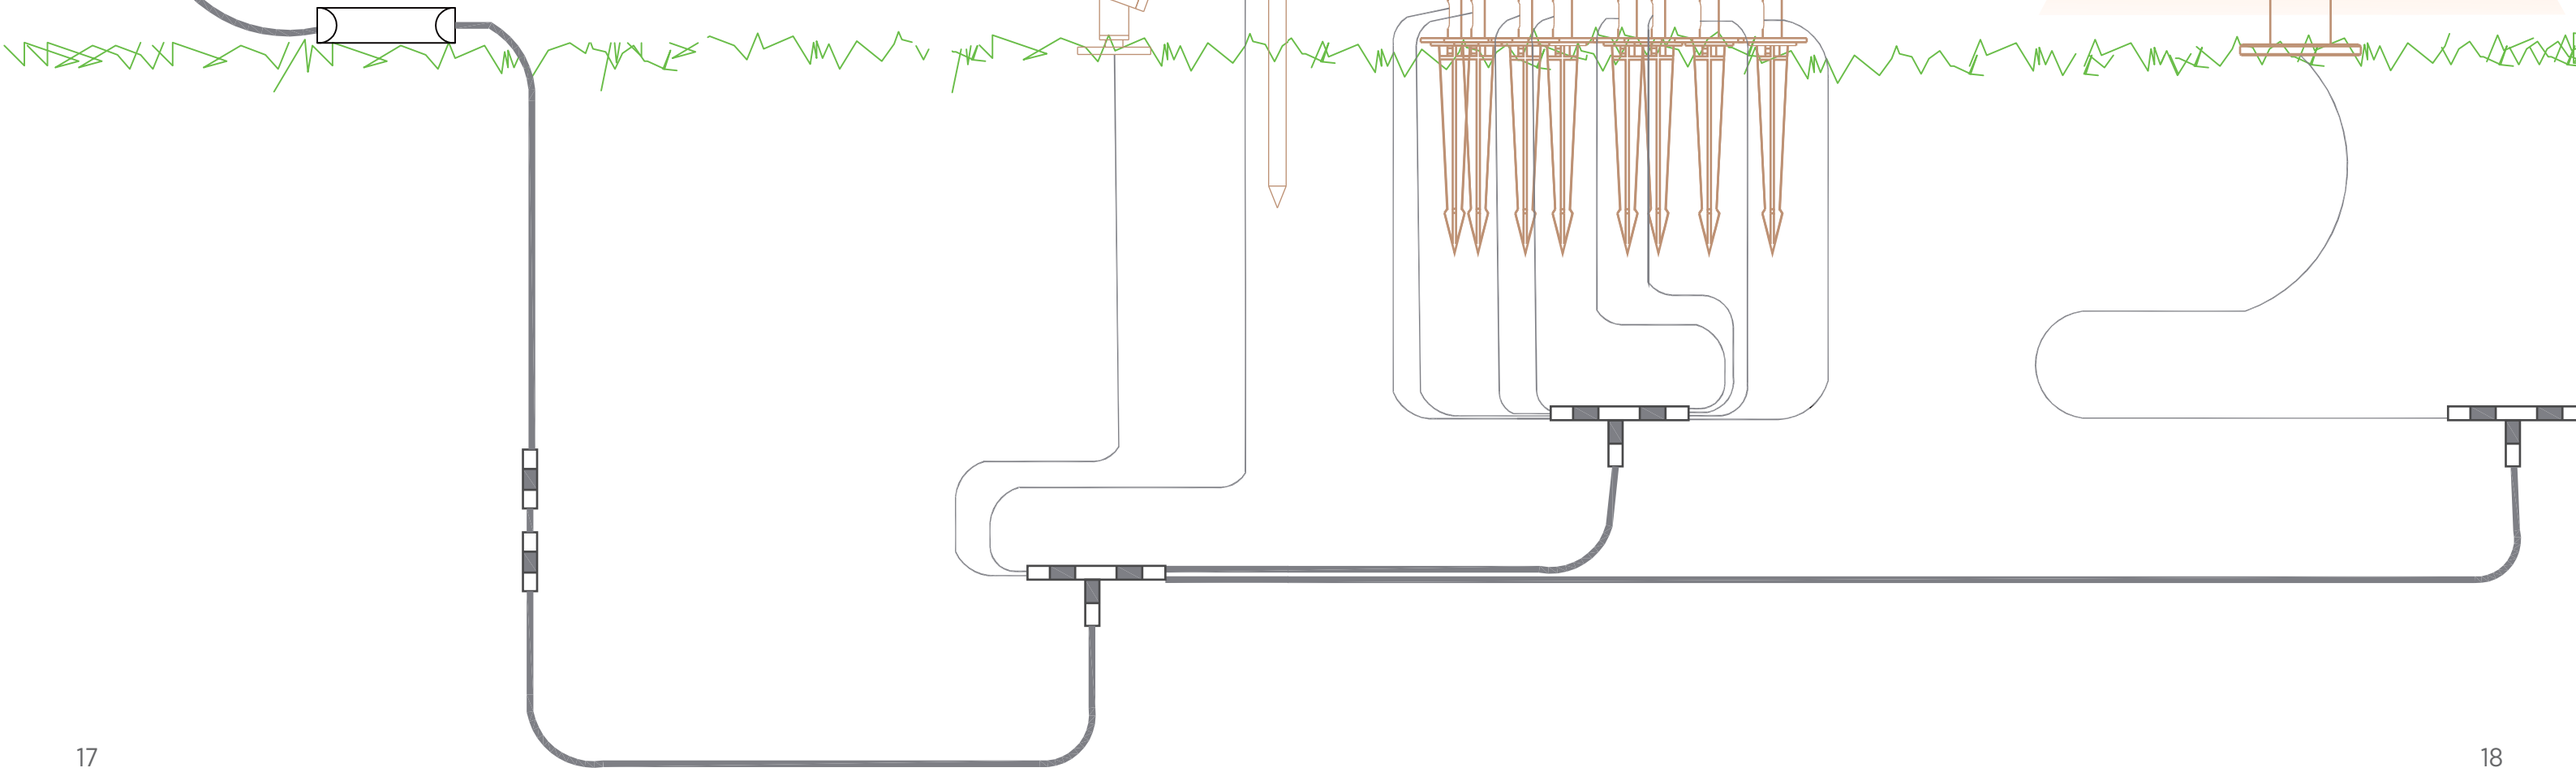

Garden decorative lights are particularly easy to install with a DC24V transformer. Several lights are available in different shapes, offering various light-ing effects in different applications. Two, three, four, or even more, the choice is yours!

Garden bollard lights are characterized by perfect uniformity of light all around, which is an essential and compact garden bollard family available to choose from.
